Research Summary

My research focuses on learning transferable visual representations for vision-language systems, spanning image-text pretraining [C1], CLIP post-training [C2], self-supervised visual pretraining [J1], and instruction-aware vision encoding for multimodal large language models [P1]. My publications include three NeurIPS papers and one CVPR paper; I am first or co-first author on four papers and corresponding author on one.

Interests: Vision-language pretraining (CLIP) · Self-supervised visual representation learning · Vision encoders for multimodal LLMs · Efficient architectures and knowledge distillation

Education

Huazhong University of Science and Technology (HUST) Sep 2022 – 2027 (expected)
Ph.D. in Computer Science and Technology (direct-entry program); Advisor: Prof. Kun He *Wuhan, China*

Huazhong University of Science and Technology (HUST) Sep 2018 – Jun 2022
B.Eng. in Computer Science and Technology; Rank: 23/373; Outstanding Graduate *Wuhan, China*

Research Experience

Li Auto Inc. Sep 2024 – Present
Research Intern *China*

- Built a distributed training and evaluation platform for vision and vision-language foundation models (DDP / FSDP / DeepSpeed), with standardized benchmarks on ImageNet and COCO.
- Scaled CLIP image-text pretraining to multi-GPU training on CC3M, using gradient-preserving all-gather for the contrastive loss and WebDataset streaming pipelines.

Safe and Robust Few-Shot Learning: Theory and Mechanisms 2024 – 2025
Key Member *HUST*

- Studied the robustness of vision foundation models to noisy and camouflaged data; designed a self-supervised pretraining method that improves robustness in downstream few-shot classification.

Mentoring

- Mentored junior students at HUST on CLIP post-training research, leading to [C2] (NeurIPS 2026), on which I served as corresponding author.

Academic Service

- **Conference Reviewer:** NeurIPS, ICLR, CVPR, AAAI
- **Journal Reviewer:** Pattern Recognition, IEEE Transactions on Cybernetics

Honors and Awards

Merit Graduate Student & Zhixing Scholarship, HUST 2023, 2024
Outstanding Graduate, HUST 2022
Third Prize (National), China Post-Graduate Mathematical Contest in Modeling 2022
Third Prize (National), Bisheng Cup Compiler System Design Competition (Team Leader) 2021
First Prize (National), Chinese Mathematics Competitions 2020

Skills

Programming: Python, PyTorch, timm, Hugging Face Transformers

Large-scale training: Multi-GPU / multi-node distributed training (DDP, FSDP, DeepSpeed ZeRO), mixed-precision training, WebDataset streaming pipelines; LLaVA-style MLLM training with Qwen2 backbones
